SAVE A SOLDIER BY SAVING NUTSHELLS

(By Associated Press) SAN FRANCISCO, Sept. 30.—The nut shell you throw into the first place after dinner may save the life of a soldier if turned into carbon to protect him against German poison gas. Fruit pits that accumulate in your kitchen will help, too. The American Red Cross calls upon every family to save these things for the government.

Brigadier General Hugh S. Johnson, director of purchases and supplies, has asked the American Red Cross to collect these things.

Individuals and organizations other than the Red Cross are urged to cooperate with the Red Cross in the important work of collecting the pits and shells. The ones used are peach stones, apricot, plum, plum, olive and cherry pits, date seeds, Brazil nut, hickory nut, walnut and butternut shells.

MAN DENIED DIVORCE FROM DIVORCED WIFE

Dr. Albert Dacosta, prominent surgeon, has just discovered that his wife has "beaten him to it" in the matter of severing their marital ties. Divorce suit filed by Dr. Dacosta was dismissed by Judge Moran, at Reno, upon presentation of evidence that Mrs. Dacosta already had secured a divorce in Illinois. Dacosta accused his wife of extreme cruelty, and his attorneys maintained that the divorce granted in Illinois was without merit. Judge Moran ruled that the Illinois decision was a bar to any action in a court of Nevada.

ESTRAY NOTICE

Taken up Saturday, one black mule with collar marks on shoulders and V. or spear brand on left hip. Owner can claim the same by calling at the county barn and paying the cost of this advertisement and feed bill. Unless claimed in five days will be sold to defray expenses. adv33045

The first woman to drive a water wagon in California is Mrs. B. Erdman, of Paso Robles.

Woman is supposed to reach the acme of her mental ability at about the age of 45, or five years earlier than the average age for the masterful productiveness of man.

FROM TIMBERMAN IN TONOPAH TO CLERK IN NATION'S BIGGEST BANK

From an obscure miner in the underground workings of Tonopah to a position in the leading bank of the United States in the short space of eight years is the good fortune that has fallen to the lot of Willie K. Novacovich, until last month ledger-keeper of the Tonopah Banking Corporation. Will was due to return from his vacation tomorrow but there is a vacancy in the position he occupied and the bank is looking for a suitable clerk.

This morning E. W. Blair, cashier of the Tonopah Banking corporation, received a telegram reading: "Have accepted a position with the National City Bank of New York." The bank is the Rockefeller institution which ranks as the biggest bank in the United States and probably has greater individual resources than any corporate bank in the world. Novacovich came to Tonopah nine years ago from San Francisco and secured employment as a timber-framer. He was ambitious to distinguish himself and, taking a vacation, he spent eight months in a Reno business college, taking an extended course which enabled him to qualify for a position with the Tonopah Banking Corporation where he displayed remarkable proficiency with the various mechanical adjuncts of modern banking accountancy. He left here a month ago with his wife and baby, saying he would be back on the first of October and nothing was said of any expectations of securing an appointment in the east. Mr. Novacovich is 31 years of age and held the office of secretary of the Young Men's Serbian society of Tonopah. His wife is a Reno lady and the loss of the young couple will be regretted in their circle of acquaintances.

MINING ENGINEERS WILL STIMULATE PRODUCTION OF STEEL PRODUCTS

(By Associated Press) NEW YORK, Sept. 30.—With an aim toward stimulating the war-time production of iron and steel and coal and coke, a special meeting of the American Institute of Mining Engineers will be held in Milwaukee, Wis., during three days beginning October 8. Prominent members of the institute of metals divisions, and the iron and steel section of the institute will be in attendance.

The Milwaukee meeting will be held simultaneously with the annual meeting of the American Foundrymen's association, and the

men actually working with the products of American mines will be able to take counsel with the American engineers on the most pressing needs of the day.

Some of the subjects to be taken up in the course of the sessions are: A symposium of the construction of the metallography of aluminum, dental alloys, radium, low temperature, distillation of Illinois and Indiana coals, the manufacture of ferro-alloys in the electric furnace, the use of coal in pulverized form, price fixing of bituminous coal by the United States fuel administration, the work of the national research council.

MOSQUITO AN ALLY OF ENEMY IN CHECKING SHIP PRODUCTION

(By Associated Press) WASHINGTON, Sept. 30.—More than one ally of the German emperor who has attempted to interfere with the shipbuilding program has come to defeat. The latest is the mosquito.

Most of the new shipyards have risen from marshlands bordering rivers, lakes, bays and inlets. These marshy places are the favorite breeding places of the mosquito and millions fed so voraciously on the men hammering out ships that, at times, they were forced to leave the ways and production was retarded. But now a great, national mosquito-fighting army has been created and this force is conducting a continuous offensive against the insect hosts.

The staff of this army is composed of mosquito fighting experts, who have fought and battered down mosquito offensives not only in this country but also in the fever-infested tropical zone where the pests have been at their worst. Among these is Lt. Col. Philip Schuyler Doane, a member of the staff of Surgeon-General Gorgas who eliminated the pest from the Panama canal zone. He is director of the department of health and sanitation of the United States shipping board and is organizing the war against the mosquito in all parts of the country.

The co-operation of state, municipal and private corporate interests has been enlisted in this war. Miles of trenches have been dug in lowlands about shipbuilding plants so that the marshes may be drained and the breeding places destroyed. Where it is impossible to drain off the stagnant water, oiling is resorted to.

At the Hog Island plant near Philadelphia, the work is being carried on with the co-operation of the state of Pennsylvania. The city of Philadelphia, the Westinghouse corporation, the Atlantic Oil Refining company and other private interests. A fund of \$250,000 has been contributed and in addition the Atlantic Oil Refining company contributes all the oil used; 9,100-acre tract of marsh land had to be treated by sprinkling pools, cutting down tall weeds, dredging and draining and within three months after work started, the water area had been reduced 95 per cent. Several big dumping stations have been erected and employed in this work and more planned.

Three thousand or more acres of the land thus reclaimed, it is estimated will be suitable for agricultural purposes and it has been suggested that this land be turned over to the Boy Scouts of Philadelphia for war gardens, as the land is within six miles of the central section of Philadelphia.

The state of New Jersey is so-

operating with Camden and Gloucester counties and the shipping board in work about the shipyards on the New Jersey side of the Delaware river. It is planned to spend \$10,000 in this district this year.

Chester, Pa., an important center for all kinds of war work, has a committee that is working with the state and shipping board and the state has agreed to appropriate \$40,000 if \$60,000 can be obtained from other sources. Other places at which work is being carried on along this line are Wilmington, N. C., which has raised \$30,000; Alexandria and Hampton, Va.; Los Angeles, Cal.; and about the yards on the gulf of Mexico.

FOURTH GREAT LOCK ON AMERICAN SOO

(By Associated Press) SAULT STE MARIE, Mich., Sept. 30.—The fourth great government lock, the largest in the world, which connects the upper and lower levels of Lakes Superior and Huron, has been virtually completed, lacking only the installation of the 1100-ton steel gates to permit the passage of large iron ore, copper and wheat cargoes.

The foundations of the lock are built into the solid rock floor of the St. Mary's river falls. Installation of the ponderous gates to span the 80-foot width of the lock chamber will start at once and will be completed early next summer. These gates will permit the lowering or raising of steamers from the level of one lake to that of the other, a height of 20 feet.

Excavating for the new lock, which will cost \$5,500,000 completed, started in 1912, and in 1915 the first concrete was poured for the walls, which are 1700 feet long, 75 feet high and taper down from eight to 26 feet in thickness.

There are four other great locks at St. Mary's rapids, three on the American and one on the Canadian

SCHOOL ATTENDANCE SHOWN BY CLASSES

The enrollment in the various grades and departments of the Tonopah schools up to and including today is as follows:

Kindergarten	40
Miss Egan	51
Miss Cross	50
Miss Sullivan	48
Miss Bennett	40
Miss Wardle	42
Miss Sheerin	39
Miss Malley	44
Miss Laque	44
Miss Bradley and Elavin (7th and 8th)	71
High school	75
High school, special	14

Total 558

At the same time last year the total enrollment was 673.

FIRST GASLESS SUNDAY FELT BY TONOPAH

Tonopah housekeepers suffered a fresh tax on their patience yesterday by an accident at the gas works which compelled Manager Brown to close down at midnight Saturday. One of the generators or retorts collapsed and there was nothing to do but to go ahead and rebuild after chasing all the firebrick that could be found in camp. The work was not completed until 3 a. m. Monday morning and then it required several hours to pump air out of the pipes, raise pressure and deliver the product which was around 7 o'clock. A new generator will be built so that the accident will not occur again. At 3 o'clock the power lines went down and the city remained without any lighting facilities until 7:30. The trouble was due to lightning at Silver Peak and a tornado of incredible violence which carried away the power lines.

SELLS OUT TOGGERY STOCK

Herman Albert, administrator of the estate of the late John Hannigan, closed a deal Saturday evening by which he disposed of the entire interest and merchandise of the Toggery store to S. F. Stein, of Los Angeles.

FORECAST OF THE WEEK

WASHINGTON, D. C., Sept. 28.—Southern Rocky mountain and plateau regions: Occasional rains first half of week, generally fair second half; nearly normal temperatures.

SWIMMING POOL

On September 30th the swimming pool will be closed at night on account of being thoroughly cleaned. Tomorrow night and every day and night thereafter until season closes it will be ready for swimmers.

NOTICE TO ELKS

All members and visiting brothers are urged to join the patriotic parade at 7:30 this evening.

LOWELL DANIELS, Secretary.

Lady Rhonda is the owner and manager of Welsh coal properties, among the largest in the world.

DEL MCCARTHY WEDS IN RENO

Delbert M. McCarthy and Miss Cecile C. Bernard, both of Reno, were married in San Francisco Saturday afternoon and are now spending their honeymoon touring the coast resorts. The ages of the couple were given in the marriage license as 25 and 22 respectively.

Mr. McCarthy will be remembered as resident agent of the Swift company in Tonopah, whose duties took him to Goldfield, Manhattan, Round Mountain and Mina. He was one of the popular young men who took an active part in junior athletics and who was prevented from entering the war by an injury sustained to one leg when he was playing football at school. Mrs. McCarthy is of French extraction whose family is among the older settlers of Washoe county. The couple will make their future home in Reno where Mr. McCarthy was called two months ago to take a position in the main Nevada office.

"MY CREED"

My parents told me not to smoke; I don't.
Nor listen to a naughty joke, I don't.
They made it clear I mustn't wink At pretty girls, or even think About intoxicating drink, I don't.
To flirt or dance is very wrong, Wild youths chase women, wine and song, I don't.
I kiss no girls, not even one; I do not know how it is done. You wouldn't think I'd have much fun, I don't.

Many great factories employing women now have women physicians in attendance.

Texas women cast nearly one-half of the total vote in the recent state primary.

Twenty-five Japanese women residing in New York city have formed an auxiliary Red Cross branch.

In recognition of his distinguished services to the allied cause the Queen of the Belgians has been presented with a special medal by the French government.

Dip your eyeglasses in cold water, dry with a clean cloth and you will find a wonderful change in your glasses. Should your eye glasses need adjusting, see me, no charge. Emil Merman, expert watchmaker. adv3251
